

PRODUCT SHELF-LIFE AND STABILITY TEST AT ACCUSCIENCE

- Stability studies are performed to predict the shelf life of the product by accelerating the rate of decomposition due to varying temperature, humidity, and light.

AccuScience offers both the Long and Accelerated Stability Studies for cannabis products.

The global CBD-infused products are fast-growing. Since the 2018 Farm Bill legalization of CBD at a federal level, an increasing number of cosmetics, nutritional supplements, food, and beverage products are being developed due to the CBD's antioxidant and anti-inflammatory benefits. Products expiration date in "use by" date or "best by" dates are needed to assure the full efficacy as advertised.

We provide ISO 17025 approved methodologies and a certificate of analysis. The senior management at AccuScience Labs has a proven track record and over 100 years of combined analytical experience. We utilize the latest instrumentation, techniques and can support or collaborate with large-scale manufacturers to further contribute to the quality and consistency of the final product.

AccuScience Accurate. Legally Defensible Data.

Accreditation#: 109150
