- DELTA-8 THC
- THCO-A
- HHC -COMING SOON

Why AccuScience Labs?

Smokable products contain CBD, THC, and varying chemicals such as propylene glycol, vegetable glycerin, vitamin E acetate, and other flavoring chemicals.

The quality, safety, and efficacy requirements are very much dependent on robust methodologies, effective preparatory & advanced analytical technology utilizing state-of-the-art instrumentation. Additionally, manufacturers must have access to an accredited third-party laboratory that is willing to provide the required research and development for their specific product and or developments.

AccuScience Labs provides analytical testing, sampling and consulting services to cannabis, hemp, food, pharmaceutical and environmental industry utilizing state-of-the-art technologies and instrumentation.

Our senior management team has more than 100 years of collective analytical testing experience. We work in testing facilities set to the standards of ISO17025 for pharmaceutical and environmental laboratories.
